# DAYTON BRIDGE HISTORY

What the Dayton Valley Bridge looked like in 1975.

The modern bridge, known as Nevada State Route 822, was built in April 1976 and replaced the Carson & Colorado Railroad bridge in the same location. The railroad tracks were converted into Dayton Valley Rd and the road was widened over the decades.

From the website: Extending east and south across the desert, the C&C's rails crossed the Carson River near what is today the site of the Dayton Bridge at the intersection of U.S. Highway 50 E., Quilici Road, and Dayton Valley Road. Ranches near or on the river benefited when rail cars brought needed supplies closer, decreasing hauling time.
